Provide a brief statement of witness

Taken by way of phone conversation.

I have known Karen Mahlo for some time and have been treating her for a significant psychiatric problem. I am aware that she recently had a massive overdose of medication, which resulted in her admission to a clinic in New Farm. I have had two recent visits from Karen, one of which and the most recent of such was in the presence of her father. I am aware that she has made at least two attempts on her life. Six to eight weeks ago she had a very large overdose. Previously she has cut her wrists and nearly bled to death. She has a significant drinking problem and as a result exhibited behavioural difficulties and was irrational. On the 23rd May 2007 she cut her right wrist. In April of 2007 she took pills and cut herself, slicing a large artery in her ankle. I am aware that Karen has been experiencing difficulties with the Medical fraternity involving her work at the Nambour Hospital and there has been involvement with Redcliffe Health and I believe that there may have been some communication indicating her return to work. I last saw the deceased on the 21st May 2008. I believe Karen last communicated with the hospital on the 23rd May 2008. I understand Karen and her partner John had recently split up. I understand that John has been supportive of Karen and I am unaware of any recent conflict between them. Any conflict often appears to have resulted from excessive alcohol consumption by Karen. I believe that Karen last communicated with my secretary and indicated that she had recently communicated with Senior Medical management and that the communication according to Karen had been positive.

I DO NOT USE THE WORD "MASSIVE" TO DESCRIBE O/P IN MY VIEW OVERDOSES ARE SMALL OR LARGE.

UNTRUE - I DID NOT SAY ANY OF THIS.

THEY WERE ABOUT TO SPLIT UP, THEY WERE ALWAYS ARGUING.

I DID NOT SAY THIS.

I DID NOT SAY THAT SHE "NEARLY BLED TO DEATH" WHEN SHE CUT ~~HER~~ HER (R) WRIST ON 22.5.07. THERE WERE 2 SMALL LACERATIONS THAT DID NOT NEED SUTURING. I DID NOT SAY THAT SHE "(SLICED)" A LARGE ARTERY IN HER ANKLE IN APRIL 2007. THE LACERATION WAS 1cm LONG AND DID NOT NEED SUTURING. THERE IS NO LARGE ARTERY IN THE ANKLE.
